Web Development

[ANIORBIT]

[Anime Orbit]

1. Organisation Overview:

- ❖ Name: [AniOrbit]
- ❖ Provide a brief history of the organisation:
 - For this website development project, a fictitious organization called AniOrbit was established.
 - It is a platform for anime information and discovery that aims to assist users in finding, exploring, and learning about anime in one handy place.
 - "Ani," which refers to anime, and "Orbit," which stands for a central location where anime information is gathered, are combined in the name.
- ❖ Mission and vision statements.
 - To provide accurate, interesting, and easily accessible anime content to anime lovers so they can learn about, comprehend, and enjoy anime.
 - To develop into a reputable online anime knowledge resource that offers anime enthusiasts worldwide a fun, educational, and easy-to-use experience.
- ❖ Target audience.
 - AniOrbit's target audience includes anime fans, novices, manga readers, teens, and young adults between the ages of 15 and 35 make up its target demographic.

2. Website Goals and Objectives:

- ❖ Define specific goals for the website (e.g., increase website traffic, generate leads, sell products, or provide valuable information).
 - Titles, genres, summaries, characters, studios, release dates, episodes, and ratings are just a few of the helpful anime details that AniOrbit will offer.
 - Thru suggestions, popular and trending titles, genre categories, and recent releases, the website will assist visitors in finding new anime.
 - Thru social media, ratings, reviews, comments, and newsletter subscriptions, AniOrbit will promote user interaction.
 - By offering dependable information and benefits to the anime community, the website will establish a professional and identifiable non-profit brand.
 - AniOrbit's ease of use, mobile friendliness, quick loading times, esthetic appeal, accessibility, and comprehensibility will all contribute to a satisfying user experience.
 - KPIs including website traffic, user interaction, return visits, social media followers, newsletter subscriptions, and user happiness will be used to judge the success of the website.

3. Current Website Analysis (if applicable):

This is a new website for the community so there is no website to analyse.

- Analyse strengths and weaknesses of the existing website.
- Identify areas for improvement based on the weaknesses identified.

4. Proposed Website Features and Functionality:

- Outline essential features (e.g., homepage, about us, contact page, products/services page) and the desired functionality.
 - Home, About Us, Anime Overview, Reviews, Suggestions, News, and Contact Us pages will all be present on the website. Anime fans will be able to find titles by genre, popularity, ratings, and release dates on the Browse Anime page, which will increase website engagement y adding an additional 6th page.
 - Titles, genres, characters, studios, episodes, release dates, summaries, and ratings will all be covered in the Anime Overview section.
 - Users will be able to locate anime by title, genre, studio, or year of release using a search feature.
 - Social networking features, reviews, ratings, and suggestions will promote community engagement.
 - Because AniOrbit is a non-profit, users can continue to access the website for free.

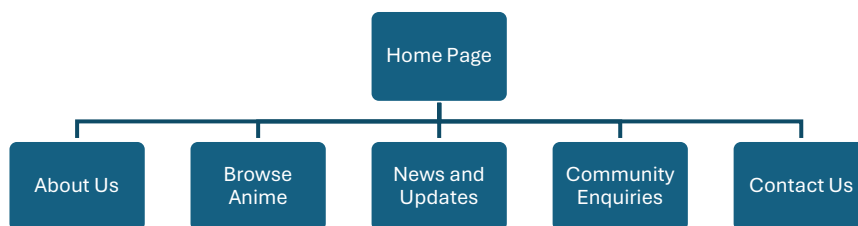

5. Design and User Experience:

- Discuss the overall design aesthetic and branding, highlighting the following:
- Colour Scheme: [Deep orange , cyan , white, and gray will be used in AniOrbit's contemporary anime-inspired style.]
- Typography: [Roboto will be used for body text and Poppins for headings and navigation. The website will work well on PCs, tablets, and smartphones using a responsive card-based style.]
- Layout and Design: [With distinct headings and an easy-to-use search feature, navigation will continue to be straightforward and consistent.]
- User experience considerations (e.g., navigation, layout, colour scheme).
 - Perceivable, operable, intelligible, and resilient content are among the acknowledged WCAG criteria that accessibility will adhere to (W3C, 2026).
- Develop low-fidelity wireframes to visualise the website's layout and information hierarchy.

Wireframes:

Hierarchy Chart:

6. Technical Requirements:

- Identify hosting and domain name requirements and programming languages and frameworks (e.g., HTML, CSS, JavaScript).
 - The website will make use of PHP, MySQL, JavaScript, HTML5, and CSS3.
 - GitHub can be utilized for version control, and Bootstrap might provide responsive design.
 - AniOrbit.org.za or AniOrbit.co.za will be the suggested domain, with shared hosting and HTTPS/SSL.

7. Timeline and Milestones:

- Create a realistic project timeline with key milestones that follow the timeline during the subject's submission dates.
 - Organizational planning, research, target audience, objectives, and requirements will all be covered in weeks one and two.
 - Low-fidelity wireframes, sitemap creation, and competitor research will be covered in weeks three and four.

- Database development, HTML, CSS, JavaScript, and visual design will all be covered in weeks five thru seven.
- Testing, debugging, accessibility, and responsive design will all be covered in weeks eight and nine.
- Final documentation, enhancements, presentation, and submission will all be covered in week ten.

8. Budget:

- Estimate the budget for development, hosting, and maintenance (while this is a series of assignments, the budget should reflect realistic amounts based on your research).
 - Design, development, testing, hosting, domain registration, and maintenance are all included in the projected R20,000–R30,000 professional development expenditure.
 - Since AniOrbit is a non-profit academic initiative, students may be able to finish development at little to no labor expense.
 - Instead than selling goods or services, future funding may come from grants, sponsorships, or donations.
